

Logo Contest Stage One

One

The font is actually from Microsoft. That's not the reason I chose it - I just liked how it looked.

Two

I believe this logo plus my other submission could actually be used together with the #3 logo as a shortened form of this one.

Three

I think this one complements Logo 2 and should be used with it, IMHO.

Four

Both a rock (foundation) and multiple paths (growth and diversity)

Five

Six

This logo submission is inspired by how important NSITSP is for allowing everyone's voice to be heard. When designing this I thought of somebody speaking and thinking before involvement in NSITSP (as depicted in dark blue) and once they are involved, their thoughts and ideas are able to be heard and set into motion (as depicted in the light blue half)

Note: underneath NSITSP I have drafted another version with the slogan "where it all begins", if you would like to see how that looks, feel free to shoot me an email.

Seven

This logo design is a little more simplistic, I wanted to show the intelligence and idea creation of NSITSP in the logo. Within the lightbulb, I also have "IT" written in the filament.

Note: underneath NSITSP I have drafted another version with the slogan "where it all begins", if you would like to see how that looks, feel free to shoot me an email.

Eight

I'm not a designer. This logo is trying to convey that members are special. Put a star on them!

Nine

Modern. Pin it! This logo could be used anywhere on a website, not just at the top of a page

Ten

Bit of a geeky feel to this logo but there's also movement to it

Eleven

I'm a Marketing Director for an IT consulting firm and just randomly came across this contest! I hope you like my design :)

National Society of IT Service Providers

Twelve

Hi! I think that a good logo is simple and clean, so that was my main focus designing this draft. Letters "IT" are black to make it easy to understand that the logo is related to IT. The arrows characterize that the right IT partner will help you grow your business.

Thirteen

We are just trying to help out friends :-)) I didn't know it was a contest when I reached out to Amy but if you like any of these our designer will tweak them and you can donate the \$\$

Fourteen

We are just trying to help out friends :-)) I didn't know it was a contest when I reached out to Amy but if you like any of these our designer will tweak them and you can donate the \$\$

Fifteen

National Society of IT Service Providers

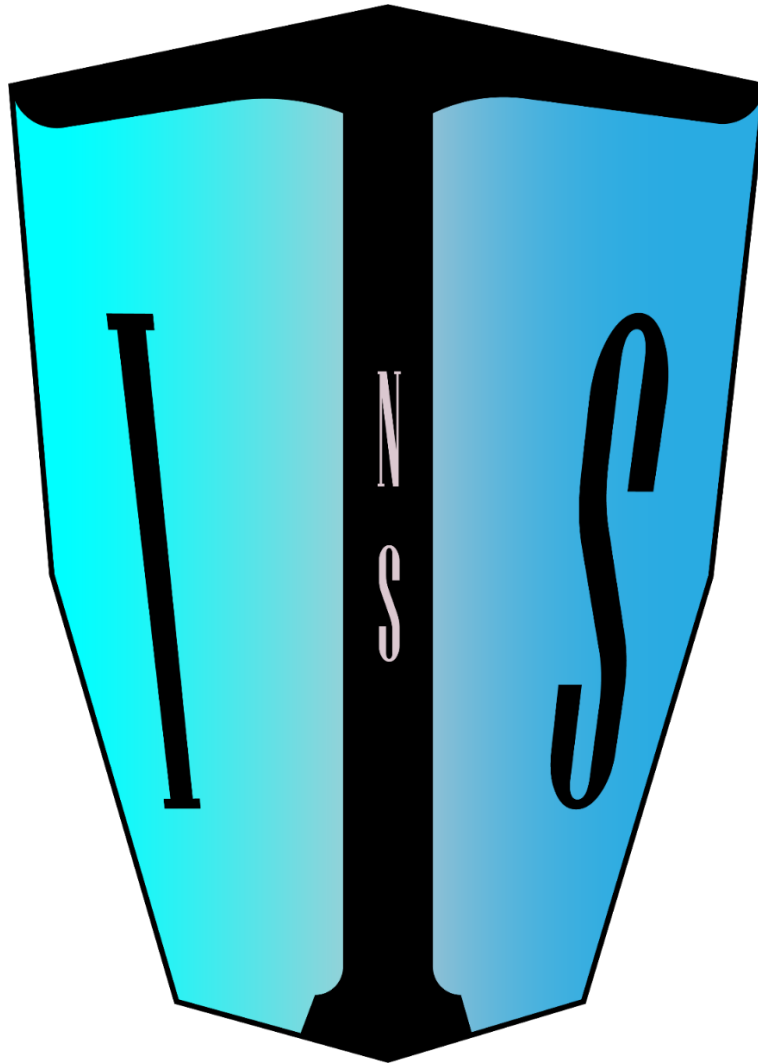

Sixteen

My logo is a minimal i-t, with a globe as the dot on the "i".

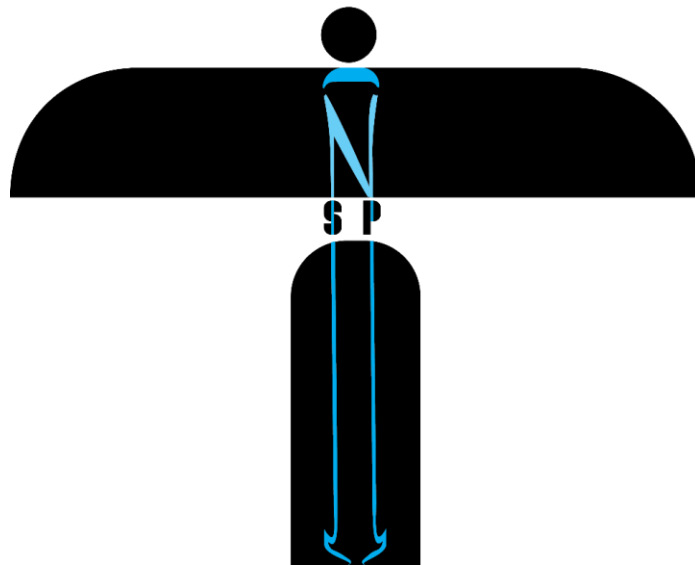

Seventeen

This logo shows that we in US will influence the IT policy makers. The logo can be upgraded to have the world map instead of the US map as shown.

Eighteen

Logo represents all IT professionals

Nineteen

Logo represents the collection of all the IT professionals in the country.
